Response

1. The amendment filed 7/29/2005 has been received and made of record.
2. After further reviewing the claims new restriction is being issued. Examiner apologizes for any burden bears to the applicant.

Election/restriction

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 19-54, drawn to demand base messaging, classified in class 709, subclass 206.
 - II. Claims 64-73, drawn to network resource allocating, classified in class 709, subclass 226.
2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because a system for generating messages does not require a system for allocation resource such as using plurality template to generate messages. The subcombination has separate utility.
3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 2157

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
